

Parlee Beach WATER MONITORING PROTOCOL

Water samples are collected daily at Parlee Beach from mid-May until October.

1  Between 10:30 a.m. and 12:00 noon.

Samples are collected at five locations daily.

at a depth of 0.5 m.

2 Samples are sent to an accredited laboratory for analysis.

Sample incubation period
24 hours.

3 Results are sent to the Office of the Chief Medical Officer of Health which shares the results and determines the beach status.

4 Water quality results and beach status are posted at www.gnb.ca/beaches

and signage is posted at Parlee Beach.
