

# Have you seen this bug?

Anyone can be affected by bedbugs.  
Everyone can prevent their spread.

- **Learn** to identify bedbugs, which can be easily confused with other small household insects.
- **Search** everything you bring into your home (for example: mattresses, box springs and furniture).
- **Look** in the seams and cracks of furniture for signs of bedbugs.
- **Do Not** bring items you find in someone else's garbage into your home.

If you find bedbugs in your New Brunswick public housing unit, immediately contact your local office of the Department of Social Development.
