

# Emergency Response Asset *Portable Mast Kits*

---

**Date in Service: 2019**  
**Number of Assets: 5**

---

## CAPABILITY OVERVIEW

Department of Transportation and Infrastructure (DTI)'s Radio Communications Division (RACOM) possesses five light-duty portable mast kits in an effort to provide a field orientated communication response. These kits allow the team to provide in fill coverage to areas needed by the clients, as part of an event response. They can be used in efforts such as:

- Radio coverage solutions in remote locations
- Challenging terrain where larger assets may not be deployed
- Geographic challenges where a fill in area of coverage is all that is required
- Exercises and training events
- Assistance to other agencies as required

These assets can be deployed as part of a small scale, or a larger scale response effort and provide some flexibility in communications planning for clients.

### Asset Locations

Fredericton, N.B.  
Bathurst, N.B.  
Moncton, N.B.  
St. Andre, N.B.  
Bathurst, N.B.
